EXCEL DASHBOARD

Instructions

Use the supplied DATA.xlsx file to create a complete Excel dashboard. The data is already clean. Create separate Pivot Tables and Dashboard sheets.

Create these six charts

Chart title	PivotTable setup	Chart type
Profit by Year	Rows: Years | Columns: Category | Values: Sum of Profit	Clustered Column
Sales by Sub-Category	Rows: Sub-Category | Values: Sum of Sales | Sort largest to smallest	Horizontal Bar
Customer Count by Year	Rows: Years | Values: Customer Name - Distinct Count	Doughnut
Top 5 Customers Profit	Rows: Customer Name | Values: Sum of Profit | Top 5 filter by Sum of Profit	Horizontal Bar
Sales by State	Rows: State | Values: Sum of Sales	Treemap
Sales by Month	Rows: Month | Values: Sum of Sales | Combine all years; sort Jan-Dec	Clustered Column

Add these three slicers

Slicer	Purpose
Category	Filter Furniture, Office Supplies or Technology.
Month	Filter one or more months.
Years	Filter by year.

Submit your work on GitHub

Upload	What to submit
Excel workbook (.xlsx)	Completed workbook with Data, Pivot Tables and Dashboard sheets.
Dashboard picture (.png/.jpg)	One screenshot showing the full dashboard with all six charts and three slicers.

Before submitting: Check that all six charts are present, all three slicers are connected and working, and both files are uploaded to GitHub.
